Education

2024 – Present | 42 Yerevan Yerevan

WURI #1–ranked international coding school

Bachelor's degree, Computer Science

Employment

Software Engineer | Sports Tech Platform Hybrid / Skolkovo, Moscow

UpT.ai · Full-time | Nov 2024 – Present (1 year 7 months)

I am responsible for designing and developing the backend infrastructure, using C#/.NET to ensure scalability, performance, and security. Since joining as an intern, I have grown into a **middle+ level** contributor, now **making key system design decisions**. I've led the integration of large language models **(LLMs)** and **implemented paywall systems** including Apple Pay, Google Pay, and Stripe. During my time here, the platform has grown **from 600 to over 1,300 users,** driven in part by backend improvements and new feature development.

Software Engineer | eSIM Connectivity Solutions Remote

gloalo · Project based | Jun 2024 – Feb 2026 (1 year 9 months)

Designed the entire server infrastructure **from scratch** using Go, with a strong focus on scalability, performance, and security. The system is currently in the testing phase and includes integrations with external services such as **Google Cloud, SendGrid, and Visa payment processing.**

Tech skills

- C#/ASP.NET, Golang
- PostgreSQL, MySQL
- System Design
- Google Cloud, AWS
- DDD, TDD
- Clean Code

Soft skills

- Communication
- Time management
- Teamwork
- Creativity
- Attention to details
- Desire to learn
- Meeting deadlines
